

ARMAMENT SYSTEMS

Most helicopters can be converted into a very effective Gun-Ship by adding compatible weapon systems.

Rock Wings Ltd. offers a pilot-operated Armament System for day- and night-time operations with machine guns, rocket launchers and other weapon platform that can be installed on both sides of the fuselage.

Our system fit not only helicopters but most Western and Eastern fixed- and rotary-winged multi-role aircraft and is custom designed to match customer's particular requirements.

Helicopter systems main components are:

1. External mount and 14" release units

An external mount is attached to the helicopter's fuselage providing stability for the weapons platform. 14" NATO release units are incorporated in the mount creating a carrying position for armaments or any other payload.
