2. Reflex Sight

The system is equipped with an electro-optical reflex sight used for axial weapons operations such as machine guns and rockets. The aiming reticle image is collimated to infinity and then reflected by a semi-transparent mirror that overlays it upon the target. An Electronic Control Unit controls the sight from the panel or from a switch located on the pilot's stick.

3. Laser Designator

Night aiming is accomplished by using a Long Range Infra-Red Laser Aiming Device which is installed parallel to the weapon allowing night targeting while using Night Vision Goggles.

4. Firing Control Box

The firing control box is located in front of the pilot, enabling the pilot numerous actions including control of the weapon type, choosing the firing side (LH, RH), number of rockets, laser designator, re-cocking and jettison in case of emergency. The system is secured by a safety pin which is removed prior to take off.

2.75" Rocket Launchers

5. Rocket Launchers and Rockets

Rock Wings Ltd. offers 2.75" FFAR & Wrap Around rocket launchers with single or ripple firing options.

The following are items available and sold separately:

- Electro optical reflex sight
